

Who can take KETO//OS?

KETO//OS is for any and everyone!

How do I take KETO//OS?

Take 1 - 2 servings of KETO//OS per day, in the morning and in the afternoon or before exercise. For people with sensitive stomachs, do 1/2 serving in the morning and 1/2 serving in the afternoon or before exercise for 1-2 days to allow your body to adapt your body to the active ingredients.

HACK: Mix KETO//OS with a high Ph water to increase efficacy.

Hydrate!

Drink 12 oz. of plain water before mixing KETO//OS or first thing in the morning.

What is KETO//OS and what can I expect?

KETO//OS is not a weight loss system. KETO//OS was designed to put therapeutic ketones in the body. Consumers are seeing an average increase of .5 mmol of ketones in the blood.

How do I know if I'm in ketosis?

Within 1 hour of taking KETO//OS test your breath, blood, or urine through any ketone testing device. (Ketone urine strips from your local pharmacy is typically the most convenient.)

Can I take KETO//OS with intermittent fasting?

Yes, KETO//OS is a great tool to use when intermittent fasting. Take it in the AM on an empty stomach, and don't eat your first meal until you're hungry in the afternoon.

[PRUVITNOW.COM/PLAYBOOK](https://pruvitnow.com/playbook) Our KETO//OS Playbook shows you how you can optimize KETO//OS with any lifestyle.

101 HYDRATE

It is important to hydrate. 75% of people are chronically dehydrated. Taking KETO//OS or beginning a ketogenic diet can deplete your electrolytes so it is important to drink more water and add sea salt to your food. This will help replenish your electrolytes.

102

START SLOWLY

We recommend everyone begin with 1/2 serving of KETO//OS because MCT oils (healthy fats) in the product are quickly absorbed.

For some, this can cause very temporary GI (Gastrointestinal) discomfort. If this is the case, repeat Day 1 until your body is acclimated or start with a 1/4 serving.

103

FASTING

KETO//OS can be taken with Fat Coffee or Keto Kreme in coffee or hot tea while following an intermittent fasting plan.

104

WITH OR WITHOUT?

KETO//OS can be taken on an empty stomach or with food.

105

DIP IT!

Ketone urine strips should be dipped in the urine at full concentration rather than held under a stream of urine or dipped in a diluted urine sample.

106

TESTING

Using a ketone blood meter and strips is the most effective way to measure ketone blood levels.

107

NOURISH

Eat more avocado and spinach. Take a calcium/magnesium/potassium supplement to assist with hydration levels and to prevent cramping.

108

GI DISCOMFORT

Adding vitamin K2 and Lypase enzyme can help with any GI discomfort.

109

DOCTOR KNOWS BEST

As with any diet changes, if you have any medical conditions, please consult your doctor.
